Cubic Zirconia

COMPANY PROFILE

SUN GEMS is a leading company name in INDIAN Cubiz Zirconia market; it was established professionally in 2002 for the purpose of manufacturing, importing and trading all kinds of cubic zirconia (CZ) and synthetic stones.

We have a huge quantity stock in Machine Cut CZ, which is a top quality machine cut stone that shows a star effect in it. It is produced by fully automated machinery, and all of the stones are tested to high quality standards for brilliance, perfection of cutting, and sharp dispersion of light and fire. Our Machine Cut Star round comes in minimum size from 0.80mm to maximum 10mm. Its heat resistance is up to 600°C/1112ºF, and size tolerance + - 0.01mm only.

We also have Machine Cut CZ in many shapes like oval, pear, square, marquise, octagon, trillion, and many other fancy shapes & sizes in bulk quantity..

Meanwhile, we also have all kinds of Normal Hand Cut CZ, synthetic stone (Red, Green, Blue) corundum and glass stones.

Our all products pass through a high quality control department which maintains the standard of quality and we are always committed to serve our customers needs and are able to assure them that they will be fully satisfied with our Quality, Price, and timely order's delivery.

SWISS STAR®

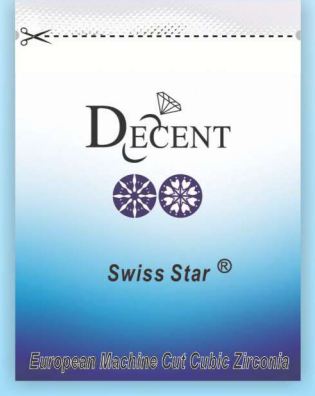
We introduce **Swiss Star®** to the industry, which is a top quality Swiss machine cut round stone that shows a star effect in it.

It is produced by fully automated European Machinery, and all of the stones are tested to high quality standards for brilliance, perfection of cutting, and sharp dispersion of light and fire. Apart from round shape Swiss star products can also produce in different shapes like Oval, Pear, Square, Marquise, Heart and many Fancy Shapes.

Our **Swiss Star®** products are now highly successful and recognize product in global market

Specification

- Standard Weight
- Swiss machine cut
- Heart and Arrow cut
- 100% Star Effect
- Suitable for Wax Casting
- Size available from 0.70mm To 10.00mm
- Size tolerance of +/- 0.010mm only



Sungems
Cubic Zirconia

European Machine Cut Cubic Zirconia

SWISS STAR® M\W

Specification

- Medium Weight
- Swiss machine cut
- Heart and Arrow cut
- 100% Star Effect
- Suitable for Wax Casting
- Size available from 0.70mm To 3.00mm
- Size tolerance of +/- 0.010mm only

SWISS STAR® W

Specification

- Heavy Weight
- Swiss machine cut
- Heart and Arrow cut
- 100% Star Effect
- Suitable for Wax Casting
- Size available from 0.70mm To 3.00mm
- Size tolerance of +/- 0.010mm only

Wonder®

Specification

- Standard Weight
- Swiss machine cut
- Heart and Arrow cut
- 100% Star Effect
- Suitable for Wax Casting
- Size available from 0.70mm To 10.00mm
- Size tolerance of +/- 0.010mm only

Wonder® M\W

Specification

- Medium Weight
- Swiss machine cut
- 100% Star Effect
- Size available from 0.70mm To 3.00mm

Wonder® W

Specification

- Heavy Weight
- Swiss machine cut
- 100% Star Effect
- Size available from 0.70mm To 3.00mm

Korean Machine Cut Cubic Zirconia...

Korean Star™

Specification

- Standard Weight
- Korean Machine Cut (CNC)
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.70mm to 12.00mm
- *57 facets star cut

Korean Star™ M\W

- Medium Weight
- Korean Machine Cut (CNC)
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.70mm to 3.00mm
- *57 facets star cut

Korean Star™ W

- Heavy Weight
- Korean Machine Cut (CNC)
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.70mm to 3.00mm
- *57 facets star cut

Sungems Cubic Zirconia

Starlite™

Specification

- Korean Machine Cut (CNC)
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.70mm to 12.00mm
- *57 facets star cut

Super Fine

Specification

- Korean Machine Cut
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.80mm to 10.00mm
- *49 facets star cut

Corundum

The name CORUNDUM is derived from Tamil word KURUNTUM meaning ruby, Corundum is crystalline form of aluminum oxide (Al2O), Synthetic Corundum is best substitute for Natural Ruby and Blue Sapphires,

Synthetic Corundum hardness is 8.5 -9.0 in mohs scale, with high melting point of 2050 C, it is fully suitable for wax casting process.

Spinel

Synthetic Spinal material is transparent to opaque with dull luster. Spinal comes in variety of colors like aquamarine, Sapphire Blue and Green in different shades from light, medium, dark. Its hardness is 8, specific gravity is 3.5 to 4.1 and heat resistance is up to 1100 C

Nano Gemstone

NANO GEMSTONE – is a ceramic material with very tiny-size Spinal phases. It has special physical and optical properties: Color - homogeneous and even, Hardness = 7 – 7.5, Refractive Index = 1.61 – 1.64, Density = 3.0 – 3.3 g/cm³, Melting Temperature 1600-1750°C, Luster and Color are maximally close to many natural gemstones. High thermal shock resistance makes Nanogem fully compatible with wax casting jewelry.

Nanogem is the best substitute of the color natural gemstones! It completely simulate the brightness, colors, hardness and density of many gemstones: Green Emerald, Blue Sapphire, Blue Topaz, Aquamarine, Citrine, Peridot, Garnet, Kunzite, Morganite, Smoky Quartz, Turquoise and many others natural gem stones.
